COGITECH supports designers, brands, and architects.

As a recognized player in the world of art and design, we develop and produce unique pieces or series of decorative and technical objects. At our Design Studio, we place materials at the core of the creative process, viewing them as an endless source of transformation, possibilities, and inspiration.

Awarded the Entreprise du Patrimoine Vivant (Living Heritage Company) label, we take pride in our hybrid craftsmanship, local presence, and commitment to maintaining an agile, human-sized team.

STUDIO— COGITECH

Innovation in materials and processes

An ecosystem.

EXPERIMENT, CREATE, MANUFACTURE AND DISTRIBUTE

In its workshop, COGITECH is developing a cross-disciplinary approach by intertwining various fields. By bringing together Design, Engineering, Materials, Traditional Craftsmanship, and Digital Manufacturing, COGITECH has been mastering the art of designing and creating exceptional objects for 24 years. Through its collaboration with STUDIO COGITECH and MANUFACTURE XXI, the company reaffirms its commitment to breaking new ground.

Studio Cogitech views materials as the fertile foundation for expressing its creativity. By freely exploring materials and processes, the STUDIO also creates objects that emerge from its experimental research, which are published by our MANUFACTURE XXI publishing house.

MANUFACTURE XXI is driven by the ambition to push experimentation with materials and craftsmanship to its limits through collections of unique objects. Our publishing house prides itself on a «slow brutalism» aesthetic, where materiality, abstract forms, and colors merge.

MANUFACTURE XXI

Limited editions based on exploratory design.

MATIÈRE PAPIER®

Making Ideas Real

matière papier

Recycled paper composite.

Developed by Cogitech, Matière Papier® is a composite made from recycled paper, used to create furniture, decorative elements, and facings.

Following the development of Minero®, a mineral composite free of petroleum-based components, Cogitech introduced Matière Papier® in 2022, a composite made from recycled cellulose.

Crafted from local and recycled materials, this low-tech solution can be cold-formed without the need for baking. With our wide range of pigments and varnishes, made from bio-sourced components, Matière Papier® is available in a variety of colors and finishes.

Fabrication des Lampes Noda, pour MANUFACTURE XXI, en Matière Papier®.

matière papier

A solution made from recycled paper

- o **Environmentally friendly**
Matière Papier is made from 70% recycled paper, water and mineral binder.
- o **Low-tech**
A low-tech solution that requires no baking during its transformation, air-dried.
- o **Thickness**
1mm - 10mm
- o **Density**
0.8
- o **Made in France**
From design to production, we carry out all projects in our workshops in Dijon.
- o **Handcrafted**
Moulded or shaped on a structure.
- o **Application**
Indoor/outdoor.
- o **Fixation**
Drilling, gluing, sanding, screwing on a structure.
